

BIRTHDAY PARTIES

animal program add-ons

ambassador animal encounter

Our educators will give a short introduction to one of our ambassador animals (educator's choice from a selection of reptiles, amphibians, and invertebrates). After, participants will be able to see the animal up-close and interact with biofacts like shells, skulls, and even eggs! **Please note there is no tactile interaction (touching) with the animal.** This activity takes place in the event room. (15 minute session)

pinniped enrichment session

Participants will have the opportunity to interact with one of our marine mammal trainers and assist in the creation of an enrichment item for our animals. After the toy is created, the birthday child helps to feed the sea lions by dropping it into the main pool. This activity takes place at the main pool viewing area on the 2nd floor. (15-20 minute session)
